Aphasia refers to difficulty in either speaking or understanding speech that may occur after a brain injury such as stroke.

If you are a person with a diagnosis of aphasia, you have the opportunity to participate in a research study at the University of Maryland, College Park

- The purpose of this study is to investigate how persons with and without aphasia speak and understand words and sentences.
- Eligible participants will receive a complete evaluation in addition to other testing (describing pictures and making judgments about words and sentences on a computer).
- The study involves 4-6 hours of participation (spread over 2-3 sessions of about 2 hours each).
- You will receive $20 per session for participation.
