Participate in Language Research

We invite you to participate in a study that compares how words and sentences are spoken and understood by persons with aphasia* and those without aphasia (normal control)

*Aphasia refers to difficulty in either speaking or understanding speech that may occur after a brain injury such as stroke.

Eligibility to participate as a healthy control:
- Right handed, primary speaker of English, 18 to 75 years old
- No prior history of speech, language, learning or other neurological/psychiatric diagnoses

The study involves
- Describing pictures, making judgments about words and sentences on a computer
- Approximately 2 hours of participation
- You will receive $10 per hour or credit for eligible courses (UMD students)
