Laurent Saloff-Coste is the Abram R. Bullis Professor of Mathematics and a faculty member in the College of Arts and Sciences. He received a John Simon Guggenheim Memorial Foundation fellowship (2006-2007) and is a fellow of the Institute of Mathematical Statistics, a fellow of the American Mathematical Society and a fellow of the American Academy of Arts and Sciences. He was educated in Paris (Université Pierre et Marie Curie, Paris VI), France, where he earned a Ph.D. (1983) and a Thèse d’État (1989). Before joining the Cornell Faculty in 1997, he taught high school mathematics as a French civil servant for 4 years, spent a year as a researcher at the Massachusetts Institute of Technology and later became Directeur de Recherche at the Centre National de la Recherche Scientifique in Toulouse. His research interests include Analysis, Partial Differential Equations, Probability Theory and Geometry, and he pursues collaborations with mathematicians around the world. His research is supported by grants from the National Science Foundation, and he currently serves on the editorial board of six mathematics journals. He is a member of the Center for Applied Mathematics (CAM) and of the graduate fields of Mathematics and Applied Mathematics. He has supervised 18 Ph.D. theses. He enjoys interacting with students and colleagues and teaching mathematics from entry-level service courses to graduate seminars. He served on the Academic Integrity Hearing Board of the College of Arts and Sciences, on the University Senate, and as the Chair of the Department of Mathematics 2009-2015 (two terms). He is currently serving on the Arts and Sciences Dean Search Committee.

I am honored to stand for election as a faculty trustee. My experience as Chair of a large department serving the entire university has taught me a great deal about some of the key challenges we face such as offering a rich and exciting experience to our students, attracting and retaining outstanding faculty, balancing our core missions of education and research and fostering a diverse, open and supportive community. In developing solutions, I believe attention must focus primarily on long term goals. Decisions must be based on an understanding of the aspirations of students and faculty, an awareness of the strengths and specificities of Cornell as an institution, a recognition that different fields have different needs and priorities, and a strong collective sense of purpose in support of Cornell’s mission. The Board of Trustees plays a key role in sustaining over the long term the university’s ambitious mission to bring together education, scholarship, discovery, innovation, engagement and service in so many different fields of study. I would be delighted to be given the opportunity to serve and participate in such an important effort. If elected, I will work hard to represent the
Cornell faculty and share with the Board my international experience, my perspective as a member of the faculty and my enthusiasm for Cornell’s extraordinary academic diversity and wide-ranging mission.
