

ACS Local Section

Cornell

Get Involved!

We're always looking for new activities, and new volunteers for what we're already doing! Check out some current activities on the other side, some ideas we have for new activities below, or grab a sticky note and add an idea of your own. We'd also be happy to try to help you get a smaller chemistry activity off the ground, check out the funding link. And a bunch of officers are wandering around the picnic right now, so please grab us for a chat if you want.

NERM

The Northeast Regional Meeting of the ACS. We'd love to bid to host the meeting again, but we need volunteers to make that happen!

Student-led Lecture Series

Want to help create a new lecture series? Name it and recruit speakers you want to see. We'll help pay for honorarium and refreshments, get the room booked, and host a recording of the lecture online.

Highschool Outreach

Are you interested in teaching? We already work with High Schools in the area – maybe they'd enjoy having you come in to do a demonstration!
