**Companion Planting**

ATTRACT BENEFICIAL INSECTS + REPEL PESTS WITH ANNUAL AND PERENNIAL FLOWERS AND HERBS

- **Good companion flowers:** cosmos, zinnias, marigolds, calendula, sweet alyssum, borage, and asters
- **Pest repelling herbs:** cilantro, parsley, dill, oregano, mint, thyme, chives, sage, and tarragon

**Maximize Diversity**

HAPPY BENEFICIAL INSECTS + BIRDS KEEP GARDENS HEALTHY!

- Offer a diverse palette of native plants to provide the best habitat for invertebrates and birds.
- These garden helpers work to keep pests out!

**Integrated Pest Management**

MINIMIZE INSECT PESTS BY USING THESE TECHNIQUES:

- **Row covers** are a barrier to keep pests out.
- **Trap crops** draw pests away from desirable crops.
- **Insect traps** lure pests away from your plants using pheromones.
- **Handpicking** targets tricky-to-lure pests.
