

# REU IN CHEMISTRY 2023

## Advancing Chemistry Research by Integrating Green Chemistry and Science Policy

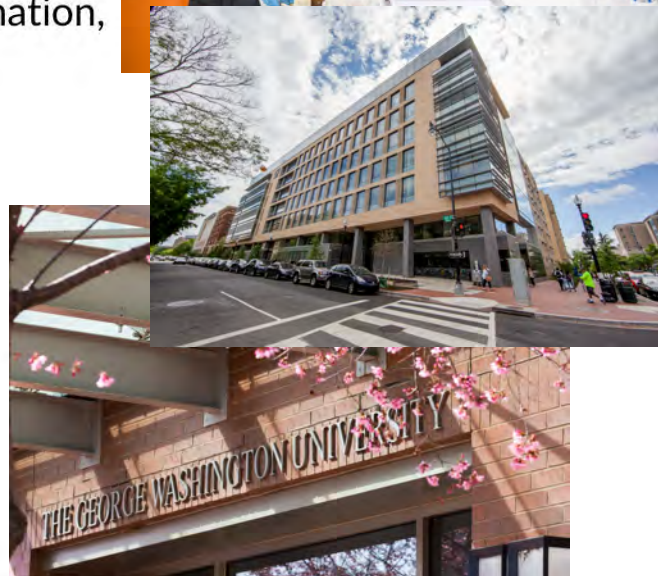

**Application Deadline - February 28, 2023**

Our program provides a unique interdisciplinary research experience for undergraduates that combines environmental and green chemistry with science policy. Students will conduct research projects with a focus on solving fundamental problems related to either green and environmental chemistry or sustainability, targeting applications in renewable energy, water desalination, renewable feedstocks, and healthcare.

### Program Details

- 10-week program: May 30 - August 4, 2023
- \$6,000 stipend
- Travel and accommodation provided
- Academic, professional development, and social programs
- Summer research in the nation's capital!
