“Attracting and Retaining Women in Oil and Gas Engineering”

Featuring

Carolyn Stewart

Regional Business Development Manager – North America, NES Global Talent

Carolyn Stewart will speak about a new report recently launched by NES Global Talent, the manpower provider, highlighting the key issues and challenges women face in the global oil and gas industry and flagging possible solutions to tackle the gender gap. The report ‘*Attracting and retaining women in oil and gas engineering – a survey examining the gender talent gap*’, highlights the myriad of pathways women are taking to find careers in oil and gas, underscoring the opportunities the sector has to cross-train from ancillary industries as well as non-traditional disciplines. The report also shows that in order to attract and retain female workers, the industry needs to improve its ability to provide mentorship, recognize workers equally and highlight the benefits of studying STEM subjects in schools and universities.

TIME

11:30 am - 1:00 pm

FEE (*please note new fees)

\$25 per person for online registration
\$35 per person for on-site registration
includes boxed lunch
