“Offshore, Brownfield Execution in West Africa”

Featuring

Kirk Barwick

Vice President Engineering, AMEC

This presentation summarizes techniques that AMEC has employed that help to ensure success throughout all stages of project execution for brownfield work scopes. Some of the challenges addressed for a recent West African project were location and lack of local supply chain infrastructure. Other aspects considered include local content requirements, material availability and logistics, SIMOPs, as well as scope integration.

TIME

11:15 am - 1:00 pm

FEE

\$25 per person for online registration
\$35 per person for on-site registration
