

Rice Global E&C Forum Roundtable

Explore the critical strategic issues facing global
E&C industries & help impact the future.

Friday, June 9, 2017

“Digitization Strategies for Engineering & Construction in the era of Industry 4.0”

Featuring

James Arrow

Lead Associate, Booz Allen Hamilton

Some of our industry’s leading companies are actively working to digitize their traditional practices but this is only delivering linear change. Digitizing existing practices largely restricts organizations to perform only Descriptive Analytics, simply automating data-gathering and traditional reporting. Exponential change and significant performance improvements can be enjoyed via practices that facilitate Diagnostic and Predictive Analytics. These approaches, combined with the aggregation of all related project data streams, will more effectively support data-driven decision making, not just during construction but, looping-back around in the lifecycle process, at program and project selection. This presentation will raise awareness and provide background information that will allow E&C companies to develop and lead an effective digital strategy in an era of Machine Intelligence and the Industrial Internet of Things.

TIME

11:15 am - 1:00 pm

FEE

\$25 per person for online registration
\$35 per person for on-site registration
includes boxed lunch

REGISTRATION

www.forum.rice.edu

NEXT ROUNDTABLE

July 7, 2017

LOCATION & PARKING

Grand Hall

Rice University Ley Student Center
Parking details at www.forum.rice.edu

PROFESSIONAL DEVELOPMENT HOUR (PDH)

These Roundtables qualify for one (1) PDH each.
Your email confirmation at completion of
registration serves as your PDH and payment
receipts. Paper receipts may be picked up at the
registration desk at time of check-in.
