“2018 Outlook for Petrochemicals: Markets in Transition”

Featuring

Paige Marie Morse, PhD
Vice President, Argus

The US is building on its cost advantage in light feedstocks to significantly expand local capacity in petrochemicals. With an ethylene boost of more than 40% and at least 6.5mn t of new polyethylene production, these volumes could overwhelm domestic and international markets even as economic growth has maintained a good pace. We will discuss the expansion of this key petrochemical building block in the context of overall petrochemical markets and capacity trends in other regions.
