I-105 Paving from Willamette River to I-5

We are working to preserve I-105 and give you a smoother ride.

This summer, we are repaving and repairing I-105 between Delta Highway and I-5 including seven bridges and several on-and off-ramps within the project area.

The current pavement and bridge decks are in poor condition. To preserve them and improve overall safety, we will remove and replace the surface. This will help extend the useful life of the road and bridge decks to give you a smoother ride.

Project work will include:

- Repave I-105 and the identified I-105 and I-5 on and off ramps.
- Remove and replace seven bridge deck surfaces.
- Add rumble strips between milepost 2.25 and 3.15.
- Add reflective strips to guardrails for improved visibility.

Beginning in August 2023, expect lane and ramp closures, delays, and shifted traffic to help expedite construction. There will be multiple detours needed to complete the ramp work. We plan to do most of the work at night, except for two weekends when we will shift traffic to expedite construction and improve worker safety. All schedules are subject to change due to weather.

Plan ahead and know before you go.

Access for pedestrians, including those with disabilities, will be available and identified through or around the work zones.
