Course Description | Comprehensive Project I is the first of a two-term capstone sequence for BLA students. The BLA capstone, called the Comprehensive Project, is intended to be an advanced planning and design project in landscape architecture that is individually identified and developed by each student. Each project should comprehensively exhibit the skills learned throughout the degree.
Comprehensive Project I, also known as Comp I, provides a setting and structure to support students in developing their Comprehensive Project.

**Prerequisite**
LA 489 studio series.

**Curricular Context**
This class is required for all BLA students.

**Class Format**
The course functions as a workplace, where students work on their project independently, but with many opportunities for feedback from faculty and peers.

Class meeting times are primarily structured around independent work, desk crits with the Instructor, informal peer review, group discussions, and student presentations. Outside of the course, students are required to continue to advance their Comp Project and meet course milestones.

**Textbook**
There is no required nor optional textbook.

**Course fees**
As a 6-credit or above class, course fees are set at $90 by the College of Design.

**Grading**
Students are required to take the class Pass/No Pass. Students are awarded a Pass grade and approved for entry into LA 499 Comprehensive Project II (Winter) upon satisfactory completion of course milestones.
