

Test Reflection – MAT 2010

This assignment is meant to help you reflect on several aspects of your study habits, performance on the exam, and a plan moving forward.

In a paper that will vary in length, address the following in a typed, 12 point font, essay of sorts. This assignment is due Tuesday, February 18, 2025 at the start of class.

Part 1: Your exam

1. What score did you receive on the exam and how do you feel about your results?
2. How long did you spend preparing for the exam?
3. Did you attend Office Hours and/or tutoring sessions in the Mathematics Resource Center (MRC) or study groups with classmates? How often? Did you feel it was beneficial?
4. What else did you do to prepare for the exam?
5. What kind of mistakes did you make? Why do you think you made those mistakes? What are you going to do to make sure that you do not repeat those mistakes on the next exam?

Part 2: Correcting your mistakes

You are to redo any problem(s) that you got wrong on the exam, regardless of how minimal the error and attach the exam and the corrections to your paper to be turned in. To be clear, “wrong” means a deduction of any point amount. No error is too small and it can lead to bigger mistakes later on.

Part 3: Your plan moving forward

1. What will you do to make sure that you earn a 100% on the next exam?
2. Are there any other comments that you would like to make about the exam or your score?

Part 4: Your instructor’s role

1. What do you expect of your instructor between now and the next exam?
2. How can she make the class better?
3. What can she do to better support you?
4. Other feedback you’d like to offer.

As a reminder, I’d like to offer the following as resources/ideas/tools for success that you may take advantage of if you need help on anything related to our course.

- Mathematics Resource Center (MRC) in FAB.
- Brielle’s Office Hours
- Email Brielle with questions
- I have you guys work in groups in class for a reason. Ask your classmates questions. Study with your groups!
- Do a Google Search of concepts you are having trouble with. Do a Youtube Search too. You’d be surprised what you find.
- Use the eBook to work extra problems
- Make an appointment to visit the Academic Success Center (ASC) to review study skills for math classes.
- CAPS – counseling services offered by WSU. They can help with life-related challenges if you need them.
- Attend every class!
- Ask questions in class!
- Brielle cannot read minds so communicate with her if you are struggling.
