Lizard Morph Bi-Weekly Meeting (Feb 19)

Here's a summary of the transcript:

- **Initial Conversation**: Mercedes informs Victoria that Ayush will likely be joining in 30 minutes, and they are uncertain about the participation of Zichen. Victoria shares some conference information ideas.
- **User Research Ideas**: Victoria proposes different methods for user research, including observing how users currently perform tasks, interviewing them about potential website features, or testing a prototype. She suggests using simple tools like Adobe XD or Google Slides for prototyping.
- **Focus on Lizards**: Mercedes questions whether only John annotates lizards in the lab, suggesting they find out if other labs have a similar role. Victoria highlights that the technology is based on existing systems for other animals and envisions the platform being adaptable for other species in the future.
- **Plans for User Research**: Mercedes suggests they should also ask Dr. Porto about research questions. Victoria outlines the next steps: polishing the app, focusing on tricky zoom features, and creating a user research plan. Afterward, they can conduct the research once Jon return from their fieldwork.
- **Meeting Wrap-up**: The meeting concludes with plans to move forward with user research and finalize app features.

The meeting revolves around user research, app development, and planning next steps for refining the system.
