

Multidisciplinary Project and Outreach Experience as a Research Scientist at a National Laboratory

Romie Morales, Pacific Northwest National Laboratory, romarie.morales@pnnl.gov

Abstract: This presentation will provide an overview of the breadth of research projects and applications spaces conducted as a relatively new research Scientist at Pacific Northwest National Laboratory (PNNL). This research includes design of experiments on for ultrasonic testing, object classification of material of interest, and remote sensing of non-proliferation activities. Objectives, task specific accomplishments, and take-home messages will be provided for each project space.
