

## Progress in Organic Photodetectors: Beyond Silicon

**Oliver Moreno**, Ph.D. student, Georgia Tech, [omoreno3@gatech.edu](mailto:omoreno3@gatech.edu)

**Advisor:** Bernard Kippelen

**Abstract:** In this talk, we will give up-date of on work on organic semiconductors and organic photodiodes. The goal of the research is advance large-area and flexible photodiodes beyond the capabilities offered by silicon-based technologies for radiation detection.
