We invite you to share your school affiliation/s and role/s.

# Land Acknowledgment

As professionals at Harvard, we acknowledge that much of our work happens on the ancestral lands of the Massachusett, Naumkeag, and Pawtucket Native nations, and we would like to acknowledge the Indigenous peoples past and present of all the lands that everyone is on today.

Please join us in recognizing the historic and ongoing harm against these members of our communities and in considering how we can each, in our own way, move forward as we engage in group processes of learning and strive for justice in education.

For a global map of indigenous territories, see <https://native-land.ca>

# Agenda

# CATME: Evaluating Teamwork Outline

1. Context for Team & Project-based Instruction
2. Team Formation
3. CATME Metrics
4. CATME Data/ Bias

# Applied Physics 50: Team Based Learning

# How do we form teams in AP50?

Inputs for Team Formation:

- gender
- physics background knowledge
- exam performance
- previous teams
- learning styles
- student concentrations

### Contributing to the Team's Work

### Keeping the Team on Track

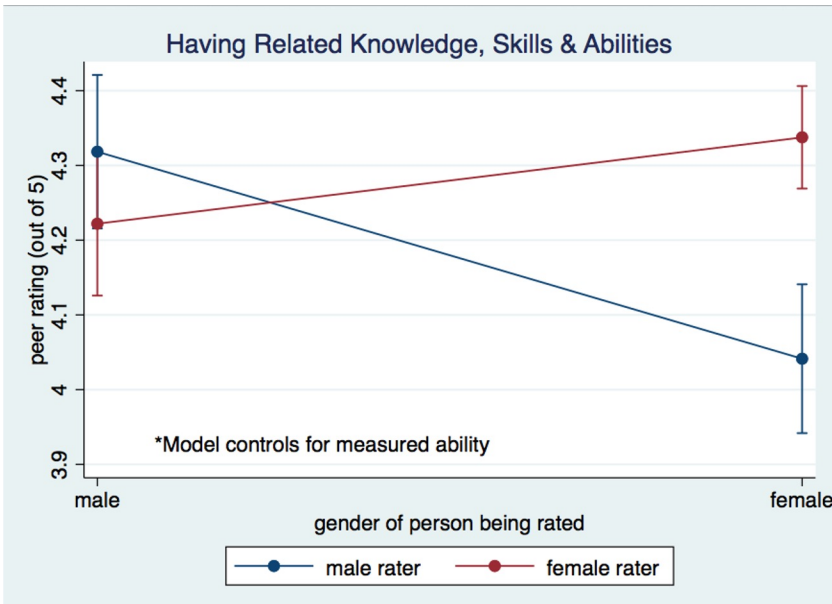

### Interacting with Teammates

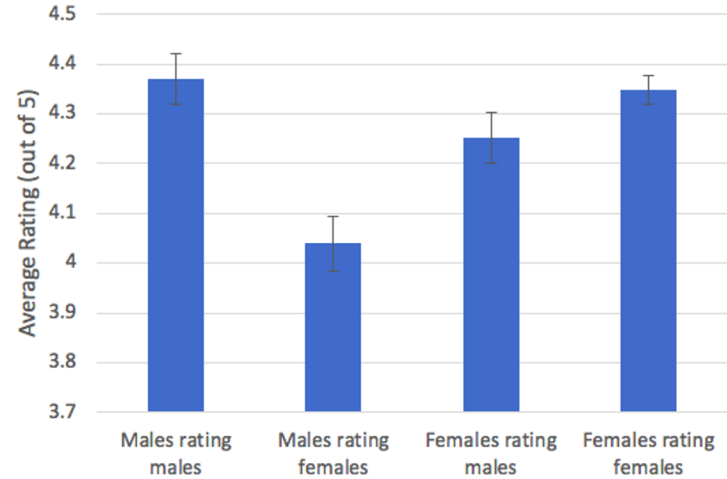

### Expecting Quality

Male students rate female students as having lower ability than other male students, even controlling for actual ability

### Having Related Knowledge, Skills, and Abilities

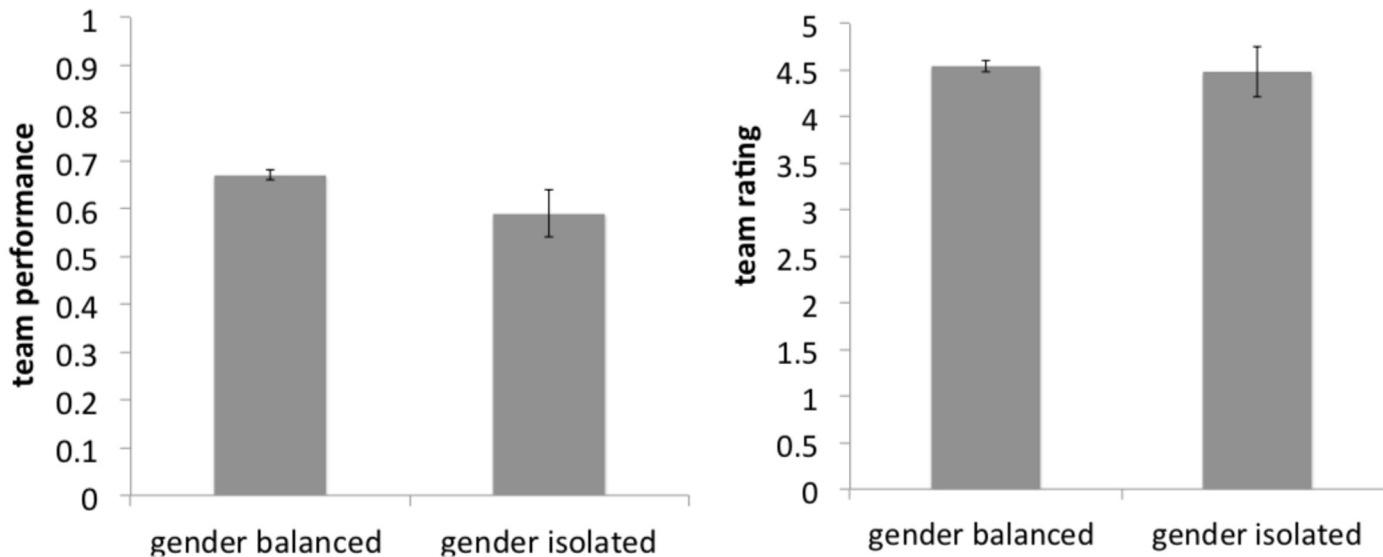

# Team-level data

Gender balanced teams perform slightly better than gender isolated teams

but - they rate their team experience just as high.

# Team-level data

Teams where all members have the same learning style **perform worse** than teams with a diversity of learning styles

but - they rate their team experience just as high.

The ability to step into the shoes of another person, aiming to **understand their feelings and perspectives**, and to use that understanding to guide our actions.

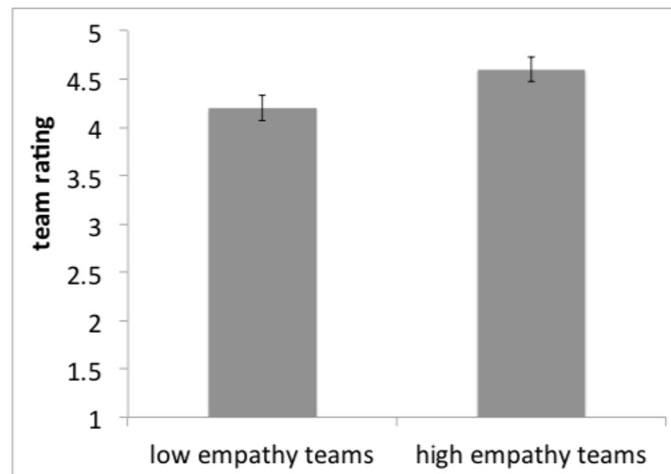

"I know exactly how you feel."

Lawrence, E. J., et al. "Measuring empathy: reliability and validity of the Empathy Quotient." *Psychological medicine* 34.05 (2004): 911-920.

# Team-level data

High empathy teams both perform better and rate their experience as higher than low empathy teams

Questions about CATME?

# The Dialogue Toolkit

Dr. Christina Smiraglia  
Harvard Graduate School of Education

# Dialogue Toolkit Outline

1. Original Purpose
2. Dialogue Moves
3. Contexts, Benefits & Challenges for Use
4. Educator & Student Feedback
5. Further Resources

## Original Use & Context

Facilitate more meaningful individual peer responses...

- on asynchronous discussion boards
- for K-16 students

“Nice job!”

“I really liked the way you paired the lines with polar-opposite views to show how different the perspectives on immigration really are.

Do you think people who are anti-immigration are creating a fair narrative of immigrants (illegal or not)—and vice versa? If not, why?”

# The Dialogue Toolkit Toolbar

What students see when they (asynchronously) respond to another student's post

POV

**NOTICE:** What stands out to you or catches your eye in this person's post? In other words, what do you notice in particular? Be specific

**APPRECIATE:** Share what you like, appreciate or value in the post you've read. Be specific.

**SNIP:** Cut and paste a phrase or sentence from the original post into your comment. Ask a question about it or say what you find interesting or important about what is being said.

**PROBE:** Probe for more details. Ask questions that will help give you a better sense of another person's perspective. (See Creative Questions & Sentence Starters below)

**CONNECT:** Make a connection between something in the post and your own experiences, feelings, or interests

**EXTEND:** Describe how the post extended your thoughts in new directions or gave you a new perspective.

POV

**POV:** Express your point of view (POV), position or opinion.

**CHALLENGE:** Question or challenge a point of view (POV) or idea someone else has shared.

**NAME:** Name the aspects of your identity, experiences, or place you live that are influencing the way you see things.

# Adapted Uses & Contexts

Facilitate more meaningful peer responses...

In discussion board response posts

On anonymous physical sticky notes about presentations

In comments on peer work in Google slide decks

(Also for providing assignment feedback!)

## Benefits

- Generally intuitive
- Modular
- Format-flexible
- Anonymity-flexible
- Free

## Challenges

- Potentially overwhelming
- Students may forget to use moves
- Unclear move names
- English-only

## Example Educator Feedback on the Tool

“two students who disagreed with one another on an issue came to a better understanding and place with one another after using the Name move to support (and describe the source of) their POV”

“students are developing the more difficult and nuanced skills of critical thinking and empathic listening – both skills that the DTK addresses. These skills are teachable but there’s not a perfect formula – I can’t say ‘you do a, you do b, you do c, and now you’re empathetic.’ The DTK gives me strategies and tools to scaffold these skills for students”

## Example Student Feedback on the Tool

“It's helped me look at things in a different way and in different perspectives”

“it helps you actually notice things and pay attention to small details instead of just typing something like 'oh i like that'”

# Questions about the Dialogue Toolkit?

# Process Together

In a breakout group with 1-2 others, take about 10 minutes to consider:

- *How might you use any of these ideas/tools in your own work?*
- *What additional questions do you have about either tool?*

Take a moment to reflect on an idea that you're personally taking away from the workshop.

When you're ready, please share it in the chat!
