Job Search Strategy

My Name: Liangshe Li

Date: 02/06/2024

Smart career goals:

1. Find a software engineer internship with the help of NU Works
2. Become a full-time Software Engineer after graduation
3. Become a senior software engineer after several years

Skills and Strengths:

Programming Languages Familiar: Python, Java (Collection, JVM, garbage collector, multithreading, etc.)

Grasp: C, C++, JavaScript, TypeScript, MATLAB, SQL, HTML5, CSS, Kotlin

Frameworks & Tools NodeJS, ReactJS, Spring boot, Angular, Git, Jira, Wiki, Wireshark, Qt Creator, Firebase

Databases MySQL, MongoDB

Operating Systems Windows, Ubuntu, CentOS, macOS

Top companies I want to work:

Amazon, Google, Microsoft, Meta, Netflix, Tesla, Oracle

Reason:

All of them are big tech companies and if I can work for them, I will make big progress in my career.

To-do:

I will post many resumes on the job boards (like Linkedin, GlassDoor, Indeed, Handshake, etc.) I will practice my coding skills on Leetcode and do many virtual interviews.

My written elevator pitch:

Hello, everyone:

My name is Liangshe Li. I am a current CS master student at Northeastern University. I have many programming skills like C, C++, Java, Python, JavaScript, TypeScript and so on. I am

also good at many frameworks like React.js, Node.js, Angular, Spring Boot and so on. I can use many types of databases like MySQL, MongoDB. I can also work on Windows, Linux and MacOS.
