

Here are the steps to use [Google My Maps](#) to create a map with location pins and embed the map in **NUSites**:

Step 1: Create a Google My Maps Map

1. **Go to Google My Maps:** Open Google My Maps in your browser.
2. Make sure you are signed into your Google account.
3. **Create a New Map:** Click the "**Create a New Map**" button.

Step 2: Add Location Pins to the Map

1. **Search for a Location:**
Use the search bar to find a location by name or address. Alternatively, you can zoom in on the map and click the spot where you want to add a pin.
2. **Add a Pin:**
After locating the spot, click the "**Add Marker**" button (pin icon) at the top of the page. Then, click on the map where you want the pin to be placed.
3. **Edit the Pin Info:**
After adding the pin, a box will pop up where you can edit the name and description for the location. You can also add images, links, or additional details.
4. **Add More Pins:**
Repeat the above steps to add more pins to the map as needed.

Step 4: Get the Embed Code

1. **Click on the three vertical dots** (menu) next to the map title.
2. Select "**Embed on my site**" from the menu.
3. Copy the provided HTML iframe code.

You can find detailed instructions on [Google Maps Help Site](#).

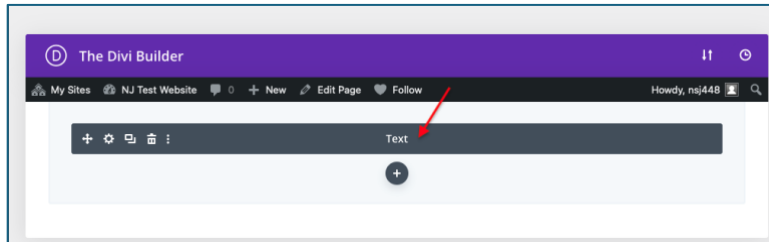

Step 5: Embed the Map in NUSites

1. **Log into NUSites:**
Go to NUSites and log into your account.

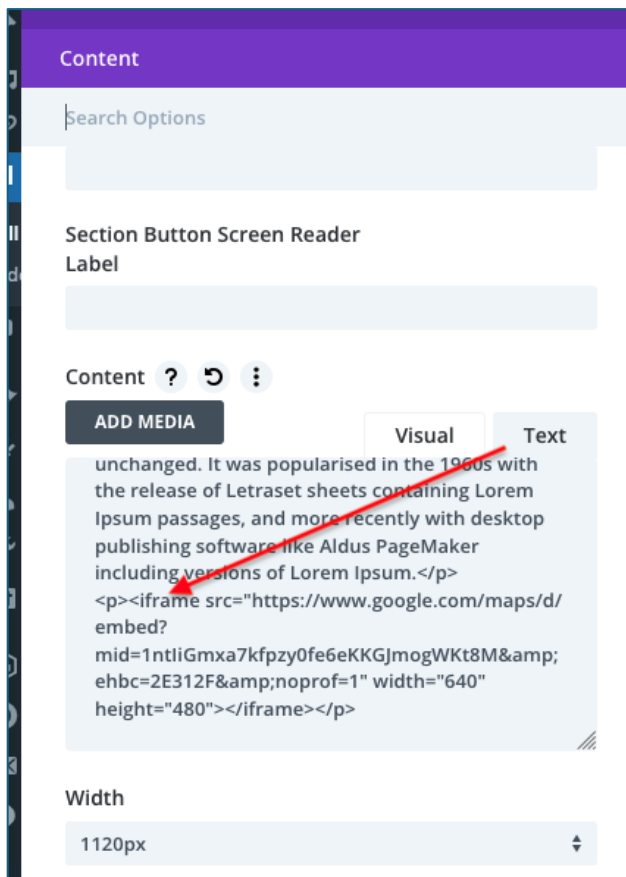

2. Edit Your Page:

Navigate to the page where you want to embed the map and click the **"Edit"** button.

3. Insert the Embed Code:

- In the NUSites text editor, select where you want the map to appear.
- Paste the iframe code you copied from Google My Maps into the embed window.

4. **Preview/Save/Publish:**

After inserting the map, save your changes, **Preview** or **Publish** to make the map visible on your NUSites page.

Step 6: View the Map

5. Once the map is embedded, you can view it directly on your NUSites page. Visitors can interact with it, zoom in/out, and click on the pins for more information.
