

Table Fan

The Challenge:

Design a nice desk fan for a hot day.

Guiding questions:

- 1) What are the basic components of a table fan?
- 2) How can I make light blades for the fan?
- 3) Can I make the fan turn on and off?
- 4) How will I make the fan stand on its own?

Possible materials

- 9V battery and battery cap
- Alligator wires
- Simple motor
- On/Off switch

Prototyping materials

- Cardboard
- Cardstock paper
- Scissors
- Tape or hot glue
- Recycled plastic containers

If you are stuck, flip over for examples!

Example: Table Fan
