FIELD ENGINEER INTERN POSITIONS AVAILABLE

Condon-Johnson & Associates (CJA) is a specialty design-build contractor with 40 years of experience in geotechnical construction including: drilled shafts, deep foundations, ground improvements, grouting, micropiles, deep soil mixing, auger cast piles, and anchored earth supports.

CJA is actively recruiting a Field Engineer Intern at our Seattle office.

In this position you will work with Project Managers and Superintendents in the office and on the jobsite learning the fundamentals of construction management and specialty geotechnical construction. Your time will be divided between office work in Seattle and field work in the Pacific Northwest, Rocky Mountains, or Alaska. This internship will give you an opportunity to participate in the estimating, planning, and construction of geotechnical projects. Interest in the design and engineering of geotechnical systems is encouraged.

Requirements:

• Actively Pursuing a BS in Civil Engineering or Construction Management
• Basic knowledge of heavy civil construction
• Interest in geotechnical construction
• Positive attitude
• Strong desire to learn
• Ability to travel and work in the field during the summer
• Work and communicate well in a team environment

Employment Benefits:

• All costs associated with travel, accommodations, and transportation between projects will be covered/reimbursed.
• This position is eligible for overtime pay.
