

UI

Landing Home Page

UX

- Welcome text is large and too stacked
↳ unclear
- picture of museum is small
- "projects in display" → "projects on display"
- why include all awards and have separate award page
- should include most recent award and link of to award page to see more
- Maybe put...
 1. projects on display
 2. more projects
 3. Awards

- hard to read big text in such a small area
- hard to view museum photo
- user is unable to go to award page from award section on landing page
